Dear Mr. Halpert,

Thank you so much for providing our day care children with a delicious, nutritious and multicultural hot lunch program. Over the past 13 years, your flexibility in providing individual lunches, for any of our children with special needs, has made lunch time at Unicorn worry free. We really appreciate your flexibility and creativity in providing a lunch that is nutritious, without compromising what they like in terms of "fun" foods to eat.

There are many occasions where our clients come to us to let us know that their child won't eat a particular food at home but will eat it at daycare, in the words of our clients, "What does Halpert do to make it taste so good?" Well, that's Halpert's TLC, nutrition know how and quality of ingredients, of course. Marvin took on the challenge of ensuring that there is as little Trans Fat in his menu as possible, without compromise to the foods children loved. Halpert and his team recognize that quality, nutrition, and appeal are very important ingredients to ensuring our children receive all they need in order to learn and be productive all day long. From one of their favorites, mac and cheese, to multigrain fish fillets, or Veggie Rotini with ricotta tomato sauce, the children always eat well!

Cheers to Marvin Halpert and team!

Yours truly,

Eric Mackey
